Education

Indian Institute of Information Technology

– Jabalpur, India

Bachelor of Technology

Technical Skills

Languages	: Java, JavaScript, TypeScript, SQL, HTML/CSS
Frontend	: Next.js, React.js, Zustand, TailwindCSS, Radix UI, Shadcn UI, Redux Toolkit, TanStack Query
Backend	: Node.js, Express.js, Spring Boot, RESTful/GraphQL APIs, WebSockets, JWT/OAuth 2.0, Caching (Redis), Message Queues (BullMQ), Elasticsearch, Microservices, API Design, Rate Limiting
Databases	: PostgreSQL, MySQL, MongoDB, Prisma ORM, Supabase
DevOps & Infra	: AWS (EC2, ECS, S3, Lambda, RDS, Amplify), Load Balancing (Nginx), Docker, Linux, CI/CD
AI & Agentic Systems	: LangChain, HuggingFace, RAG (Retrieval-Augmented Generation), Vector Databases, Agentic AI, LLM Integration

Experience

Software Engineering Intern

December 2025 – June 2026

Skyclad Ventures

Remote

- Engineered backend services for a court E-Filing platform, supporting 5+ filing lifecycle stages, document validation workflows, payment processing, and organization management.
- Implemented secure authentication and authorization using **JWT**, refresh tokens, and **Role-Based Access Control (RBAC)**, managing access across 4 user roles in a multi-tenant environment.
- Developed APIs and business logic for a **Super Admin payment portal** from scratch, enabling organization creation, partner onboarding, payment configuration, and transaction management.
- Designed plugin-based payment integrations and worked with PostgreSQL-backed services to deliver scalable, production-ready workflows.

Software Engineering Intern

June 2025 – August 2025

Bloop

Remote

- Collaborated with the Backend team to refactor and optimize the company's website using **RESTful APIs**, resulting in a 15% improvement in page load performance and enhanced code maintainability.
- Created and modified robust validation and error-handling logic in **Express.js**, increasing RESTful-API reliability, conducted endpoint testing using **Postman** and **Insomnia**.
- Architected and enhanced Bloop's **Credit-based review & rewards system** by refining credit accrual and redemption logic, improving transparency, preventing fraud, and driving higher user engagement and retention

Projects

Fyn – Money Manager WebApp | *GitHub* | *Live*

– 2025

Spring Boot, Spring Security, MySQL, JPA, Hibernate, JWT, React.js, Maven, Git

- Launched and deployed a finance management platform using Spring Boot (Java) and React.js, MySQL and Maven, enabling users to manage 100% of income and expense workflows through an intuitive dashboard.
- Hardened authentication and API access with Spring Security and JWT, protecting account data across all secured endpoints.
- Modeled and optimized the MySQL database schema, including entity relationships, indexing, and data normalization, ensuring high data integrity, scalability, and consistency across all financial transactions.

Kairo – Visual Workflow Automation and Job Scheduler | *GitHub*

– 2025

Next.js, React Flow, Zustand, Node.js, Express.js, Redis, BullMQ, PostgreSQL, Docker, Stripe

- Created and developed a no-code workflow automation platform using Next.js, React Flow, and Zustand, enabling 50+ users to visually build and manage job pipelines, reducing project delivery time by 40%.
- Architected and deployed a scalable backend using Node.js (Express.js), PostgreSQL, and containerized with Docker, reliably handling 100+ workflow executions per day.
- Integrated Stripe for subscription-based billing and implemented monitoring with Sentry, supporting 20+ paid users while reducing manual payment operations by 8 hours/week and improving system observability.

Achievements and Extracurricular Activities

- Solved **700+ algorithmic challenges** across multiple platforms, demonstrating consistency and strong grasp of data structures and algorithms.
- Ranked in the top 5% (Rank 4486) in CodeChef Starter 91, earned a 3-star competitive programming rating.
- **Agile Requirements Foundations** : Gained expertise in Agile practices and requirement gathering | *Certificate*
